EDUCATION

AppAcademy (May 2020 - February 2021)
Full Stack Web Development

- Object Oriented Design in Ruby
- HTML & CSS
- Database Design & Querying Techniques using MySQL and PostgreSQL
- Data Structures & basic Algorithmic Analysis
- RESTful Application Design & MVC Paradigm in Rails
- Functional & Asynchronous Programming in JavaScript
- Frontend Rendering using React
- Frontend State Management using Redux

Northeastern University (January 2016 - May 2016)
Computer Science Bridge Coursework

- Introduction to Functional Programming
- Data Structures & Discrete Mathematics

Hartwick College (September 2010 - May 2014)
Bachelor's Degree
Mathematics, Economics 3.9

- Discrete Mathematics
- Linear Algebra
- Abstract Algebra
- Real Analysis
- Number Theory
- Econometrics

SKILLS

Ruby	Rails
JavaScript	React
Redux	SQL
HTML	CSS
Docker	Git
zsh/bash	AWS S3
AJAX	React D3

WORK EXPERIENCE

Plaid, Inc. (August 2021 - Present)
Technical Support Engineer

- Investigated issues on behalf of Plaid clients, including connectivity failures and 400 errors, incorrect data in API endpoint response, and OAuth, MFA, and credentials issues
- Examined Plaid logs for HTTP error codes, request and response parameters, and JSON data contents
- Executed SQL queries on Plaid database tables to find trends and scope issues
- Examined Plaid source code to discover, diagnose, and correct bugs
- Opened, searched, and appended Jira tickets
- Communicated Plaid documentation, API behavior, and troubleshooting techniques to developers attempting to integrate with Plaid

Northeastern University (September 2017 - December 2017)
Computer Science Tutor

- Tutored grad students in Intro to Functional Programming at Northeastern University's Seattle campus

Salisbury School (September 2014 - May 2015)
Mathematics Teacher

- Taught Advanced Placement Calculus BC, Multivariable Calculus, and Probability & Statistics to high school juniors and seniors

PROJECTS

CouponVision
<https://www.coupons.aaronparisi.dev>

- Generated a large dataset of grocery store product coupon data using data.world's **grocery store data**
- Built a Rails API:
 - Customized database seeding schema, JSON object return data, and API endpoints
- Built several interactive data visualizations using React and D3
 - Line Chart showing number of active coupons over time per grocery store chain
 - Stacked Bar Chart showing distribution of coupon brands among grocery store chains
 - Tile Charts showing total savings available across brands

Springfield BnB
<https://www.springfield-bnb.aaronparisi.dev>

- Built with a React+Redux frontend and a Rails API, this Simpsons-themed Air BnB clone features AWS S3 image storage & frontend authentication
- Configured API to accept CORS requests from both local and live frontends
- Addressed AWS configuration and secret key exposure

Towers of Hanoi AI Demo
<https://www.towers.aaronparisi.dev>

- Created an interactive demo version of Towers of Hanoi that relies on ES6 promise syntax and implements the recursive solution to the game
- Designed and implemented intuitive mouseover features using jQuery

Todos
<https://www.todos.aaronparisi.dev>

- Bundled a standard Todos app with Webpacker and some customizations to package.json
- Blended Rails erb views with pure React components
- Made database queries using Axios and ES6 promise syntax

... and many more!
